

HAVEN - Primary Care and Community Health Advanced Elective

Preference Form

Brief Description: This Advanced Clinical Elective in Primary Care and Community Health provides the learner with an experience in primary care at a unique, underserved site: HAVEN, the Yale student-run free clinic which serves predominantly Hispanic, adult uninsured persons. This is an opportunity for students to gain clinical experience and help serve an underserved population in an urban medical site where students will also help teach and supervise students earlier in their training. This elective provides flexibility to students in that there are no formal requirements during the 8 or 16 Saturdays weeks students are assigned the elective.

Please note: You will still need to apply for the HAVEN elective via MedHub

NAME: _____
